|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Understanding of Sustainability and the City System | Demonstrates a thorough understanding of the city system and its sustainability challenges. Provides accurate, detailed information and insightful analysis of the system's current state and potential improvements. | Shows a good understanding of the city system. Information is accurate but lacks depth or some connections to sustainability are unclear. | Shows a basic understanding of the city system with limited analysis. Some information may be inaccurate or incomplete. | Demonstrates little to no understanding of the city system or its sustainability challenges. Information is largely incorrect or missing. | ___ / 4<br>COMMENTS: |
| Creativity in Proposed Solutions                    | Solutions are highly creative, practical, and well-researched. They address the sustainability challenges in a thoughtful and innovative way.                                                                         | Solutions are creative and practical but lack originality or thorough research.                                                           | Solutions show some creativity but are impractical, vague, or under-developed.                                          | Solutions lack creativity, relevance, or feasibility.                                                                                     | ___ / 4<br>COMMENTS: |
| Quality of Visuals and Materials                    | Visuals are highly engaging, visually appealing, and effectively support the presentation.                                                                                                                            | Visuals are clear and supportive of the presentation but lack some polish or creativity.                                                  | Visuals are basic and provide minimal support for the presentation. They may appear rushed                              | Visuals are missing, unclear, or fail to support the presentation.                                                                        | ___ / 4<br>COMMENTS: |

|                                           |                                                                                                                                        |                                                                                                                              |                                                                                        |                                                                                                          |                      |
